Para: Camila Barbosa <camilagomss@gmail.com>

dear authors and TCP members,

due to our great achievement in paper submissions this year, we have 75 accepted papers.

In order to get a good schedule for the conference, without parallel sessions, we decided to begin the scientific conference on November 8th, instead of November 9th, as previously planned. The presentations are expected to end on November 11th at noon.

This period is still included in the encompassing Robotica 2017 event.

We are working hard to offer the best conference organization.

With best regards,

Eduardo Todt LARS-SBR chair
